

## Turn Around Management

### Benefits

---

- ✓ Low cost
- ✓ Industry standard
- ✓ Intuitive Interface
- ✓ Interchangeable
- ✓ Scalable
- ✓ Highly configurable
- ✓ Cloud based or local database
- ✓ Reliability emphasis
- ✓ Hardware independent
- ✓ Free customisation
- ✓ Simple training

### Overview

Abomis Turn Around Management helps ramp supervisors and staff automate data gathering processes enabling them to retrieve real-time data on the status of aircraft turnaround

- gathering real-time pushback and towing, fueling, baggage loading and unloading, catering, and passenger boarding data
- enables ramp operators greater precision for more accurate invoices
- improved data precision and better delay tracking
- retrieval of uncollected revenue by accurate billing
- cross-platform on web, phone, or tablet

# Abomis TAM Module

## One Platform Multi-Modules

ABOMIS Turn Around Management allows operations planners and ramp managers to

- easily view the current status of aircraft to ensure timely decisions
- Ramp supervisors can use a tablet or smartphones for data entry, reject or confirm, and change aircraft status
- Automation helps ground handlers and airlines ensure precise time data of aircraft turnaround

- Accurate invoicing due to precise data increasing airline revenues

## Features

- ✓ Ability to retrieve real-time turnaround information from flight ramp coordinator through tablet and smartphone
- ✓ Billing on the airline rules and turnaround data
- ✓ Real-time graphical and numerical charts
- ✓ Management control
- ✓ Electronic invoicing system for airlines and ground handlers which can be customized
- ✓ Generation of management and analysis reports via interactive management dashboards to evaluate and optimize business processes
- ✓ Remarkably efficient real-time costing of ground handlers
- ✓ Eliminate paper-based operations
- ✓ Low investment and maintenance cost
